

## Dendrobium Extract

Dendrobium is a genus of mostly epiphytic and lithophytic orchids in the family Orchidaceae. It is an enormous genus, containing more than 1,800 species that are found in diverse habitats throughout much of south, east, and southeast Asia. Some Dendrobium species are cultivated as medicinal plants.

### Product Overview

Dendrobium contains several chemicals, and some may have effects on the body. They may lower blood pressure, increase blood sugar, and reduce pain. They may also increase the chance of seizure. However, none of these effects have been studied in humans. Therefore, the effects of dendrobium on the human body are not clear. Creative Enzymes provides natural dendrobium extract for scientific research.

### Product Information

Product Name	<a href="#">Dendrobium Extract</a>	Appearance	Brown Yellow fine powder
Cat No.	<a href="#">EXTW-134</a>	Package	25KG/Drum with double plastic bag of foodstuff inside
Source	Stem		
Species	Dendrobium Nobile L.	Storage	2 years under well storage situation and stored away from direct sunlight
Purity	4-10:1 by TLC		

Creative Enzymes also provides other natural [plant extracts](#) for research or industry uses. Please [contact us](#) for any product needs.
